

AMENDMENTS TO THE CLAIMS:

Claims 1-5 (canceled)

Claim 6 (new): A valve structure comprising:

a base having a cylinder and a coupler integrally formed with said cylinder, said cylinder having an open end, a closed end, and an extruding plug provided at an inner side of said closed end, said coupler having interior threads;

a locking ring mounted within said cylinder;

a hollow pipe fitted in said open end of said cylinder and movably mounted in said cylinder, said hollow pipe having one end provided with exterior threads for screwing to a nozzle, said hollow pipe being provided with a rib ring which is served as a stopper for said nozzle, a flange being formed on said hollow pipe for interlocking with said locking ring, a groove being formed between said rib ring and said flange to prevent water from leaking; and

an O-ring fitted in said groove.
